

## **All you need to know about the miracle of Betterair**

- Betterair is the world's first environmental probiotic.
- Betterair is the only purifier that can actually BOOST your IMMUNE system.
- Betterair's probiotic purification systems are fully automated, operate 24/7 and require no maintenance.
- Betterair is the only product that purifies surfaces and objects as well as the air.
- Existing air purifiers only target pathogens in the air, not on surfaces and objects where they breed.
- 80% of infectious diseases are transmitted by touching a contaminated surface- carpet, floors, tables, sinks, pillows, keyboards, mattresses and other fixtures of your home or office.
- Germs don't breed in the air, they breed on surfaces. They then become airborne by any minute movement of air.
- Betterair is the only purifier that attacks these pathogens at their source.
- Other air purifiers kill the good bacteria (aka probiotics) along with the bad, making your environment less healthy not more.
- Chemical cleaners and sanitizers kill the good along with the bad as well.
- Surface cleansers may kill organisms temporarily but leave food for resilient pathogens and viruses to reinfect the area.
- Betterair reduces the likelihood these pathogens, viruses and allergens return. It keeps on working long after applied.
- Betterair is 100% natural, organic and safe for humans, infants and pets.
- Betterair has been proven to eliminate a virus akin to the coronavirus family on surfaces by 99.99%.
- Superbugs and drug resistant bacteria are becoming most serious global health threat. Over sterilization with anti-biotics and chemical cleaners insures their prosperity.

**Breathe Better, Live Safer and Be Healthier**
